INEVITABLE END HAS BEEN REACHED.

m present indications," said Mr. Fitspatrick to-day, "it seems as if vitable confronts us. However, Mr. Wilkins and myself will go to honorable end consistent with the rights of the employees to prevent buble. I hoped that the meeting of the Board of Directors on Saturday mid lead to a settlement of the dispute. Concerning the reported action the directors in upholding President Hall I have nothing to say."

It is probable that, when confronted directly with the alternative of receiving a joint committee or having the road tied up by a strike, President Hall will call a special meeting of the Board of Directors. He said toby that he had not decided whether or not he would call such a meeting.

The question at issue between the road and the men is not so much one of wages and hours as it is of the right of the men to appoint their own mmittee when grievances are to be presented. They are trying to wipe out a system which the road inaugurated with the intention of preventing

This system divides the employees into many classes. In case of grievances committees from each class only can confer with the officers. As it is seldom that all the employees of a railroad have grievances at the same time, the New Haven Road never has to deal with but a small proportion of its men who are dissatisfied. The employees have decided that the time has come for the establishment of the principle that an injury to one is the concern of all, and it is for this principle that they have been fighting thus

Although a schedule of demands has not been presented formally to President Hail, he has learned through his detectives what the men want. If a conference could be brought about it is believed that the request of the men for shorter hours, pay for overtime and some of the minor points would be favorably considered. President Hall has expressed himself as opposed to the placing of freight conductors in line for promotion to enger runs.

The New Haven Citizens' Committee is a powerful organization, comspeed of the leading business men of the city. This committee settled the trolley strike in New Haven last fall, after the whole street railway system of the city had been tied up. Nathan W. Kendall, a wealthy brewer and an employer of hundreds of men, is at the head of the committee. A strike on the New Haven Railroad would result in practically fying up the business of New Haven, and the citizens are extremely anxious that an amicable settlement may be had.

PRESIDENT HALL AN ECONOMIZER.

President John M. Hall, of the New Haven road, upon whom will rest the responsibility of the strike if a strike is called, is not a practical railroad man. He is a lawyer by training and experience and has served as a Judge in Connecticut. His first connection with the New York. New Haven and Hartford came about in 1892 when he was elected vice-nr. dent to succeed Lucius Tuttle.

He was elected president in November, 1899, after a bitter contest beween the New England stockholders on one side and J. Pierpont Morgan and William Rockefeller on the other. The Morgan-Rockefeller interests finally agreed to Mr. Hall's election as a compromise, after forcing an agreement that he would protect them.

President Hall is noted chiefly for the depth of his knowledge of methods of economy. As an expense reducer he is revered by the New England stockholders. He has made a close study of railroading from an economical standpoint, and travellers on the line agree that as a close cheese-parer he is an eminent success.

The men have the sympathy of the people of every town in New England throug. which the railroad passes. Although these people will be put to Buffalo's great murder mystery was gone into the "den" and found Mr. Bur WRIGHT'S NIECE so long as the railroad is getting its share of trouble. In discussing strike plans the employees have taken this feelingof hostility into consideration than on the opening day, and they

and they believe it will be a powerful factor in working for ultimate success.

Were given the front seats. It was a graphionable audience, lively, chatty, chatty, charty, ch has computed that if the demands of the men are granted it will mean an additional expense of more than \$500,000 a year. The stock pays 8 per cent.
